Introducing Factchain

a blockchain based approach for fighting fake news

based on hyperledger technologies

Alexander Fiveg   Daniel Loebenberger   Zaur Molotnikov

IBM Blockchain Hackathon, 25 November 2017
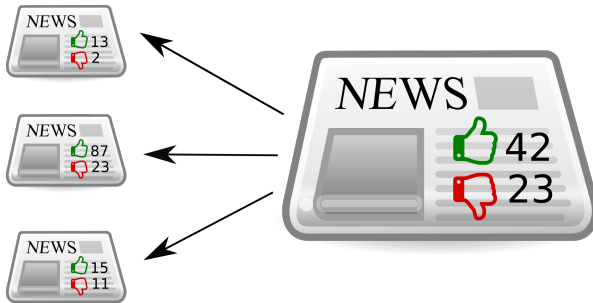

The Problem

Fake news!!!

Stakeholders

Publishers and journalists

Idea

Store scored news in blockchain, referencing prior scored news.

Value Proposition

Access to a public, reliable, immutable source of facts.

User Interface

Outlook

- Extend the idea to other stakeholders, such as readers of news.
- Then, an incentive for correct voting has to be added.
- Finally, defeat fake news!
